DETAILED ACTION

1. In response to the communications dated 11/12/2002, claims 1- 9 are pending in this application as a result of the addition of claims 8-9.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1-9 are rejected under 35 U. S. C. § 102 (e) as being anticipated by Horie et al., U.S. patent No. 6,323,052.

Regarding claims 1-5 and 8-9, Horie et al. disclose the a semiconductor laser device, comprising: an oxide formed as a protective coating on at least one light emitting end surface of a semiconductor laser chip; and an Si film (14) having a film (See column 15, line 53-54) thickness of 40 \AA or less (See column 15, line 67-68) formed between the at least one light emitting end surface and the oxide protective coating (See Fig 1). The oxide protective coating comprises AlO_x (See column 16, line 19-37). The semiconductor laser chip has an active layer containing Al (See column 12, line 9-11).

With respect to claims 6-7, the methods for manufacturing the semiconductor laser device are considered as product by process steps.

Conclusion

3. When responding to the office action, Applicants are advised to provide the examiner with the line numbers and page numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.
